(54) Title: PREMOUNTING DEVICE FOR CUTTING RING FITTING

(57) Abstract: A premounting device for a cutting ring fitting, the device comprising a frame part (1), support means (2), a movable actuator (3), means for moving the movable actuator (3) and a socket means (10) that is detachably attached to the movable actuator (3), the movable actuator (3) being arranged to move outwardly from the frame part (1). The support means (2) and the socket means (10) are arranged to cooperate for sandwiching a nut (5) and a cutting ring (6) set on the outer surface of a tubular element (4) between the support means (2) and the socket means (10) so as to premount a cutting ring fitting. In the premounting device for the cutting ring fitting according to the invention the support means (2) are arranged to be radially adjustable and in operational connection with the socket means (10) to provide said adjustment.

Declaration under Rule 4.17:

- *as to applicant's entitlement to apply for and be granted a patent (Rule 4.17(ii)) for all designations*

Published:

- *with international search report*

- *before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments*
